Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 (line 5-11), the recitations of different temperatures of each step without reciting the time interval is considered indefinite because it is unclear how the temperature of each step changes without stating any duration of each step.

### ***Allowable Subject Matter***

3. Claims 1-6 would be allowable if the 112 rejection of claims 1-6 is allowable.
4. The following is an examiner's statement of reasons for allowance:

As of the date of this office action, the examiner has not located or identified any reference that can be used singularly or in combination with another reference including the closest prior art of Pullukat (US 4,031,298) to render the present invention anticipated or obvious to one of ordinary skill in the art. Pullukat is silent on the temperature range and steps being claimed.

*The invention of claims 1-6 relates to a **process for producing a resin suitable for use as extruded pipe comprising polymerizing ethylene or copolymerizing ethylene and an alpha-olefin comonomer comprising 3 to 10 carbon atoms, in the presence of a chromium and titanium-based catalyst activated by:***

*(a) **contacting said catalyst in a reactor at a temperature of between about 370-540°C (700-1000°F) with an atmosphere consisting essentially of an inert gas; and then***

*(b) **introducing an oxidant into said reactor so that the temperature of said reactor does not exceed about 510°C (950°F); and then***

*(c) **completing the activation of said catalyst in a reactor at a temperature of about 548-638°C (1020-1180°F) under an oxidizing atmosphere.***
